SUMMARY ANALYSIS

REMOTE VIEWING SESSION 803

1. (S/NOFORN) This report documents a remote viewing session conducted in compliance with a request for information.
2. (S/NOFORN) The remote viewer's impressions of the target are provided as raw intelligence data, and as such, have not been subjected to any intermediate analysis, evaluation or collation. Interpretation and use of the information provided is the responsibility of the requestor.
3. (S/NOFORN) The protocol used for this session is detailed in the document Grill Flame Protocol, AMSAA Applied Remote Viewing Protocol (S), undated.
4. (S/NOFORN) Following is a transcript of the viewer's impressions during the remote viewing session. At TAB A is target cuing information provided the remote viewer. TAB B contains the one drawing produced by the viewer.

TRANSCRIPT

REMOTE VIEWING SESSION 803

TIME

#43.5: This will be a remote viewing session for 14 August 1981 with a start time of 0830 hours.

Preliminary data here. Are you testing over there?

#46: Yeah. 14 August.

#43.5: Thank you very much.

#46: You're welcome.

#43.5: Okay #46. Now I want you to relax and concentrate. Our target for today is geographic coordinates:

[REDACTED] SG1A

I want you to relax and move your awareness to that location. Let me repeat the coordinates:

[REDACTED] SG1A

Relax and concentrate your awareness on that location and only that location, and describe the area to me.

PAUSE

+03 #46: The, uh, the focus of attention is on the.....uh...a white, uh...a white, uh..almost sandy area. But it's not sand, it's hard. With a...trees that are..interspersed, so to speak... As if..those trees represent some kind of.... military emplacements....which are, uh...poised... for the time being in a defensive attitude towards a...towards a... an anticipated, uh...aggression. It's like...I don't know why the whiteness..predominant and perhaps salient geographical feature within those coordinates that you've indicated.

#43.5: What is your perspective?

#46: Say again?

#43.5: What is your perspective right now? Where are you?

~~SECRET~~

~~SECRET~~

#46: It's overhead.... It's overhead, like looking at a map in relief... It encompasses a pretty wide area.

#43.5: Okay, hold your position, hold your perspective above, 1,000 feet above this target area and describe to me some of the terrain features that you see that will help us to locate where we are. Okay?

+10 #46: I'll try it..... Well immediately north of, uh...this white and somewhat open space area is a...is a...vegetation in terms of trees, not heavy vegetation. And this slopes... uh...sort of, gradually slopes upward to some high hills. I don't think you could characterize it as mountains, but they're close to it. In the, uh, southern portion or south of this area of attention is a..uh..a territorial border. It's a country border. And, uh...that seems to be in the vicinity of a hundred miles... And east of this area is also a territorial border... And west as well...

#43.5: What is it you sense that makes you say that?

#46: Say again?

#43.5: What is it that you see that makes you say that?

#46: Just from looking. There's something about a...water that would be to the, uh...south southwest..or a little farther west than that. But in that general direction. Something like a....something like a...gulf, maybe smaller than a gulf. But it's...it's the closest part of...it's as close as the sea waters I can find.

+16 #43.5: Okay. At this time I want you to relax. We're going to shift your perspective back in time to the morning of 10 January 1981. Focus your attention back to the morning of 10 January 1981, at this same location, [REDACTED] SG1A

SG1A [REDACTED] The morning of 10 January 1981, in the early morning hours. I want you to focus on that morning and tell me about any activity going on in this area that would be of interest to us.

PAUSE

#46: Two things happened. The entire area became shadowed, like overcast. And the definite impression that the shadows were... manmade. And underneath this haze..... I see a... military type with a gas mask, and the, uh, hose from the gas mask is a long one that goes to a (mumble) canister, as if he were walking, trying to find his way through that maze.....

~~SECRET~~

~~SECRET~~

#46: What you want is definitely connected with the...overcast, the shadows, the entire area.

#43.5: You can break through that shadow and tell me what's there.

PAUSE

#46: I tried it three times now and all I see is...is a...is a big tank just churning in there. I don't have anything else.

#43.5: Okay. What kind of tank is this that you see?

#46: A regular military tank.

#43.5: A military tank.

#46: Yeah.

#43.5: Do you see any- are there any structures in this area, buildings in this area?

#46: No, I haven't seen a building from, uh..from the beginning. What it is, it's representative of emplacements. It's like a fire power, gun placement of.. It's hard to describe. It's like a activity emplacement. It's as if it were..

#43.5: Is there anything else you can tell me about the morning of 10 January 1981?

PAUSE

#43.5: Okay #46 I want you to bring your awareness back-

+20 #46: Just before you do....there's a...there's a civilian aircraft in there someplace, a 707 someplace. But there's no, uh... that's not the result of a crash or anything. Just there. That's all I can get really.

#43.5: I want you to bring your awareness back to the current time today. And at this time I have no further questions. Is there anything that you would like to add?

#46: No.

#43.5: That'll be all.

Okay, all finished with the drawing? Go ahead.

#46: This is sketch number one. It's entitled geographical overview. The area of interest is this type of ellipse within the geographical area, bounded by territorial boundaries. And, uh, I've labeled that with an arrow as the principal area of interest. And what I perceived was several military emplacements of sorts that were in a whitish type area.

~~SECRET~~

~~SECRET~~

- #46: Immediately north to that was a veg- an area of green vegetation. Not extremely thick, but perceptible. And rising to a high hill area to the north. The only, uh.. the only evidence...the only evidence of sea water was to the southwest and what I perceived to be a gulf.
- #43.5: That's this area over here.
- #46: That's quite far. In fact from, uh..this is out of perspective. From the principal area of interest down to the southern portion of the country boundary is about at least 100 miles in that area. Then I kinda lose track. So this thing is out of perspective, and the principal areas of interest is a bit exaggerated.
- #43.5: How big is that area? You know, approximately. Do you have any feel for that?
- #46: Oh, yeah... I don't know. We're talkin' maybe..seven, eight miles maybe...
- #43.5: Okay. Anything else you wanna add?
- #46: No.
- #43.5: All right. Well, thank you much.

TARGET CUING INFORMATION

REMOTE VIEWING SESSION 803

SG1A

1. (S/NOFORN) At the start of the session the viewer was provided the target geographic coordinates [REDACTED]. During the session, the viewer was asked to move back in time and focus on the morning of 10 January 1981.
2. (U) This was the first session concerning this project.
